

Dengue Awareness

"A healthy life begins with awareness—stay clean, stay safe, and keep dengue away."

Dengue Awareness Poster & Collage Making Activity 🍷 Grades 3–5 & Grade XI

Our young changemakers from Grades III to V and the creative minds of Grade XI came together this week for a special Dengue Awareness Poster and Collage Making Activity! 🧠 ✨

With colors, creativity, and compassion, students designed impactful posters and informative collages to spread awareness about Dengue prevention, symptoms, and safety measures. From the importance of avoiding stagnant water to using mosquito repellents and nets, their artwork was a powerful reminder that awareness is the first step to prevention.

Let's continue to stay informed and stay safe! 🤔 🌿
